# 2 Very Different Ways to Look at Housing Numbers

This week was chock full of housing data ranging from construction and builder sentiment to the most recent tally on existing home sales. The takeaways can **vary** depending on your angle of approach. So let's look at all angles!

A key news item came from the New Residential Construction report, which counts building permits and "housing starts" (the breaking of ground on a new home). The headlines essentially wrote themselves as housing starts hit the highest level in **more than a decade**.

On the one hand, "highest in more than a decade" sounds impressive. **On the other hand**, considering where we were a decade ago, housing only needed to be "sideways to slightly stronger" to earn the distinction.

Caveats aside, things could certainly be much worse for home building, as can be seen in this week's Housing Market Index from the National Association of Home Builders. Although builder sentiment is down in recent months, it remains in historically high territory.

#### Market Data

	Price / Yield	Change
MBS UMBS 6.0	99.37	+0.30
MBS GNMA 6.0	100.35	+0.27
10 YR Treasury	4.6645	-0.0394
30 YR Treasury	4.7739	-0.0400
Driging as of: 1/26 5:05DM EST		

### **Recent Housing Data**

		Value	Change
Mortgage Apps	Apr 24	196.7	-2.67%
Building Permits	Mar	1.46M	-3.95%
Housing Starts	Mar	1.32M	-13.15%
New Home Sales	Mar	693K	+4.68%
Pending Home Sales	Feb	75.6	+1.75%
Existing Home Sales	Feb	3.97M	-0.75%
Builder Confidence	Mar	51	+6.25%

In separate data, the National Association of Realtors released its monthly report on Existing Homes. Sales continue trudging mostly sideways, **raising questions** about a potential ceiling.

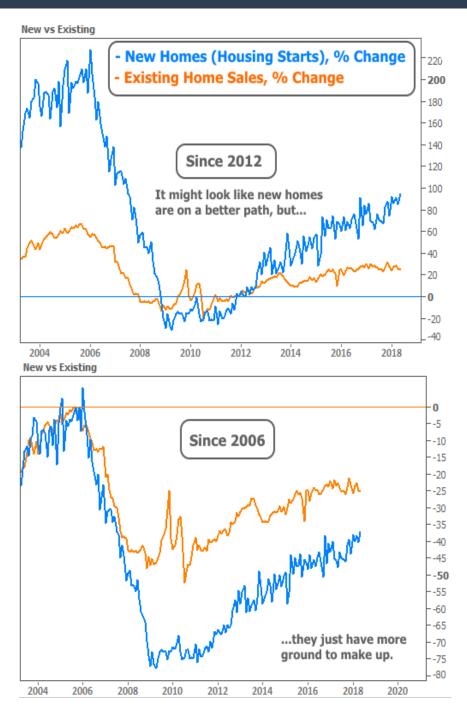

Based on the chart above, it looks like existing home sales aren't doing as well as new construction. We can compare the two more fairly in terms of "percent change." Even then, we can get two different impressions. For instance, with 2012 as a baseline, NEW homes look like the clear winner. But with a baseline of 2006 (before the crisis), new homes just have more catching up to do.

It's not just housing data that has a tendency to look completely different depending on our vantage point. **Stocks and bonds** are another classic example. Conventional wisdom holds that bond yields (aka "interest rates") and stocks tend to move in the same direction. That was definitely the case this week, as can be seen in the following chart. Over shorter time frames, such a high level of correlation is common, but the long-term charts look very different.

While that longer-term chart might seem like it **disproves** the conventional wisdom, it actually contains some clues. For instance, notice that rates (orange line) were generally rising and peaking at the same time as stocks in 2000 and 2007. If we were to zoom in on those time frames and re-scale the chart, we'd begin to see much more correlation.

Some of the market-watchers calling for a recession or a stock correction are seeing the same potential correlation over the past 12 months. It's definitely NOT safe to assume this means a ceiling is in for rates. Rather, the point is that if stocks really are hitting a longer-term ceiling in 2018, the consolation is that rates would likely follow stocks lower.

# **Experience and Service**

I absolutely love seeing the faces of new homeowners when they have their keys handed to them for the first time! Helping people achieve their dream of homeownership drives me to be my best every day. Honesty and transparency from day one through closing provide the foundation for client trust. I pride myself on providing my clients with the knowledge, experience, and creativity to make informed decisions when buying a home or an investment property.

My clients continually reward me with referrals citing customer service and comfort with the process. By ensuring my clients understand their decisions rather than simply 'do as I say,' they feel empowered and confident each step of the way. I believe in clients-for-life and that begins with the first phone call, reinforced by a successful transaction, and solidified with service after sale.

Currently licensed in Nevada and Arizona, I have been successfully financing residential real estate throughout the USA for the past 15 years using FHA, VA, Conventional, as well as Portfolio funds. Call now to get started!
